The American people will have to wait only a few days longer to find out who the traitors are in the United States Senate. The question is no longer one of politics or of expediency. It is an issue between loyalty to the United States and loyalty to Spain.

The late Editor of the Louisville Dispatch is at war with the President of the Company, and they are firing red-hot paper wads at each other. They have already come dangerously near passing the lie; but one of the facts that has come out is that the paper has been operated for the past year at a dead loss of only \$1,391 per month.

Here is what the mud roads of Maysville have cost each year for thirteen years past:

Year	Cost
1886	\$9,397.41
1887	4,384.17
1888	6,109.78

1896	4,572.30
1897	10,076.99
1898	3,790.45

Total.....\$101,145.15

An average of \$7,780.39 for each year.

How do you like the exhibit, Messrs. Taxpayers?

And what have you to show for your outlay?

The threat of the anti-ratificationists, says The Times-Star, to place AGONCILLO's letters in the Congressional Record by reading them in the Senate can but revert upon the head of the projectors of the move.

Technically any official connection that any Senator may have with AGONCILLO is treason and his seat is forfeited. Technically the United States is still at war with Spain, and the Filipino subjects, even though they be in rebellion, AGONCILLO could be arrested legally and deported as a Spanish subject, but the Administration knows that such action, however legitimate, would just suit the Tagal ends. Treason in the United States consists in giving aid and comfort to the enemies of the country. Giving aid and comfort to a Spanish subject is thus treason. The refusal of the United States to bolster up the cause of the Tagals in deporting AGONCILLO may not, however, extend to the member of the Senate who openly and in The Record grants aid and comfort to an enemy of the United States. It would not be the President alone who would have to bear the brunt of the charge, but the Senate. The Senator who places any document of a treasonable character on the pages of The Record is very liable to be impeached for treason by the body of which he is a member.

THE PRIDE OF THE WORLD IS THE VULCAN!

OVERLAPPING DISC HARROW

We know that this is the best DISC HARROW in the world! It cost us considerable money and three years time spent fooling with other Harrows to find out this. We give you the information gratis. This Harrow has thirteen discs—seven discs in one gang and six in the other. Throw the gangs in any position you please, on either side of the hill or any angle of a cross-cut and this seventh disc is always in the middle performing its work—positively and absolutely cutting out all the center. This Harrow has no neck weight, runs light and, owing to the patent method of hanging the gangs, literally tears the ground all to pieces. It is the strongest and best made Harrow on earth, weighing 625 pounds! We put out forty-four of them last Spring and they simply revolutionized the business. We can show you voluntary testimonials from the best farmers in this country! Don't make a mistake but buy an up-to-date Harrow.

THE VULCAN!

We know that the VULCAN is the best Plow made. We wrestled with plow handles, trying to hold the Plow into Bracken county soil, two full years before we found this out. You need not tell us your troubles with other Plows—how hard it is to hold into land—what a mean furrow it makes—how your points break—how the bolt in the point is eternally breaking—how you have to carry the Plow around the end—we have been all along the line. But our troubles all ended when we bought a VULCAN! The Vulcan Point, Landside and Moldboard interlock—do not fail on the Standard. You never break a bolt on a Vulcan Plow because the interlocking device takes all the strain off the bolts! We put out last year 103 Vulcan Plows and never sold a single Moldboard. Vulcan Moldboards are ridged—the ridges are not chilled thus adding 40 per cent. to their strength. Owing to the peculiar shape of the Vulcan Landside it takes the land well and sticks. Why the Vulcan plows a fairly good furrow without the operator holding the handles!

FARM WAGONS!

We experimented with FARM WAGONS eight years before we found one to suit us. At last we found 'way down in Alabama a factory who would build a Wagon the way we wanted it. We have the spokes made of butt cuts off two-year old hickory—hubs of Pennsylvania black birch—all woodwork dipped in hot linseed oil—swelled tires put on perfectly cold—boxings put in hubs without any wedges—Ironed very heavy—built in proportion and perfectly balanced. This Wagon runs like a buggy! This Wagon is called FLORENCE after the town in which it is made. We have patent brake on this Wagon, hung from rods on both sides, thus bringing direct pressure upon each wheel in locking. We buy these Wagons in five carload lots and quote the lowest price on earth. ONLY \$37.00 for Two-horse Running Gear. ONLY \$47.25 for Two-horse Wagon complete with Bed, lazy-back Spring Seat, anti-spreaders, and Patent Brake—brake your Wagon from both right and left-hand side.

LOOK! YE BEGINNERS!
